

WorldCat Interlibrary Loan (ILL)

Before using WorldCat, you should try searching the myLibrary catalog, then MOBIUS, and then Prospector. WorldCat is the last step in finding an item to borrow. WorldCat requests available in MOBIUS and Prospector will be canceled.

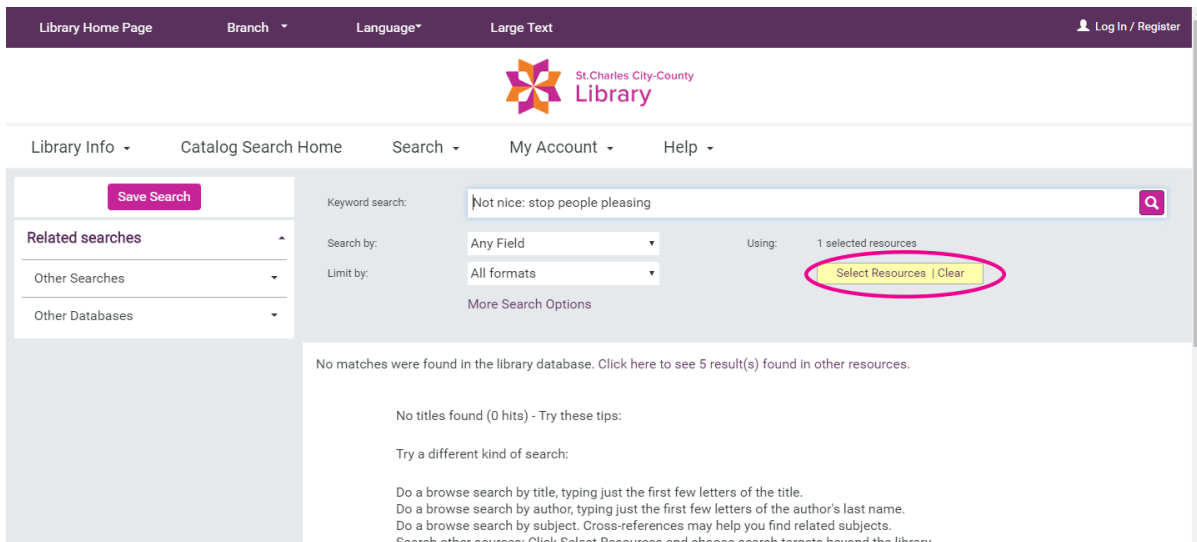

Using the myLibrary Catalog, search for your item using the *Quick Library Search* bar

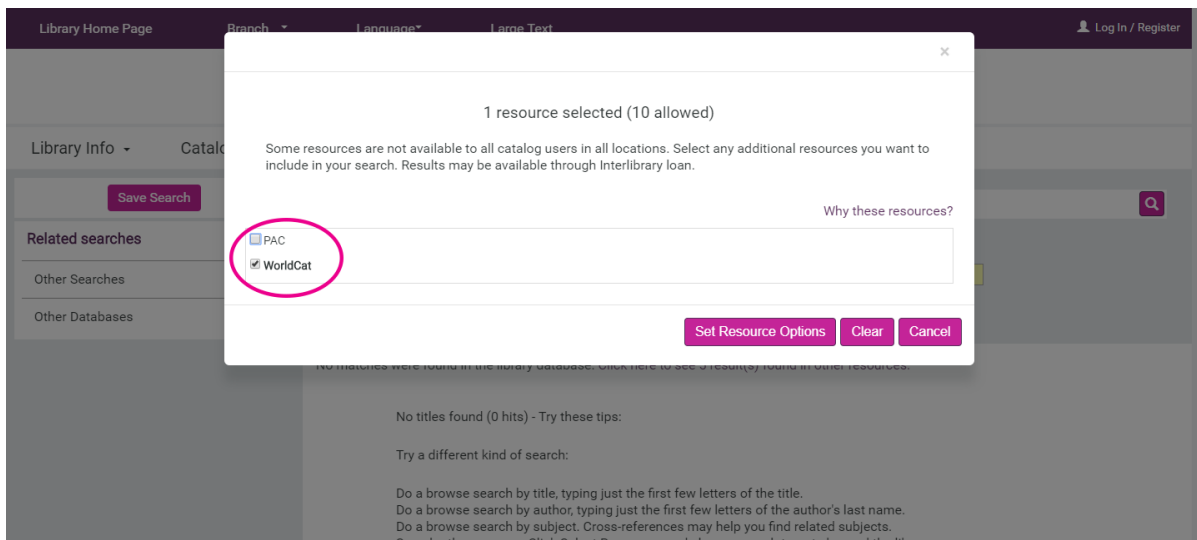

If your item does not appear, try MOBIUS. See Instructions [here](#).

If you still cannot find your item after searching MOBIUS and Prospector, use the *Select Resources* button.

Check the box for WORLDCAT (Interlibrary Loan catalog). The box for PAC (myLibrary catalog) may be checked or unchecked. Click *Set Resource Options* to search again.

In the results list, there will be a “Place Hold” button for the available options. Check the publication date and format, the total number of pages, and make sure the listed source is WORLDCAT. If all is correct, use the *Place Hold* button to request the item.
